Skills

HTML5	CSS3	AngularJS	Angular2	Github	Gulp
JavaScript	jQuery	NodeJS	PostgreSQL	React	Sass

Projects

Smart Table – iamkeithjones.com/projects/smarttable Jan 2017

Tech: ReactJS, JavaScript, Sass, NodeJS, PostgreSQL

As a group, our goal was to create a restaurant app to eliminate the need of ordering through wait staff. We decided to learn the React library to accomplish this. My main focus was the landing page, creating user logins and encrypting / hashing passwords.

Current Cuts Vinyl – iamkeithjones.com/projects/currentcutsvinyl Jan 2017

Tech: AngularJS, JavaScript, Sass, Gulp, NodeJS, PostgreSQL

My goal was to create an ecommerce website to sell vinyl decals (stickers) that I make. The biggest challenge was building a shopping cart from scratch. I used Facebook OAuth and created a page with admin privileges. I plan on using this as a production website once the final touches are added.

Black Jack Card Game – iamkeithjones.com/projects/cardgame Nov 2017

Tech: AngularJS, JavaScript, Sass, Gulp

I wanted to build a basic Black Jack card game - I used the deckofcardsapi.com API to draw cards from, and created the dealer logic all using AngularJS. I also used keyframes for the card-sliding animations.

Experience

Current Cuts Vinyl – Federal Way, WA Jun 2014 – Present

Owner

- Create custom vinyl graphics for decals
- Set up booths at various farmer's markets and festivals to sell products
- Run online store
- Marketing through various social media channels such as Instagram and Facebook

FedEx Trade Networks – Auburn, WA Jan 2015 – Oct 2016

Administrative Coordinator

- Enter data into system efficiently and accurately.
- Run QA checks to ensure data has been entered properly.
- Receive emails from forwarders and open files in internal system.
- Monitor files on hold on a daily basis and provide updates to files and customers.
- Run weekly performance reports with Excel.

Education

DevMountain – Provo, UT Oct 2016 – Feb 2017
Learned Full-Stack Development and completed 3 projects
